Local Access versus Guest Access You can connect computers or devices to your Router by giving them local access (Computers and devices option) or guest access (Guest access option) . Computers and devices with local access will have access to the Internet and to other devices on your local network, including shared computers and

Linksys E2000 User Guide

TSB is one of the first time-sharing systems I ever worked on. It ran a form of BASIC ("Time Shared Basic", or TSB) and had accounts of the form lnnn where l ran from A to Z and nnn from 000 to 999. The account A000 was the rough equivalent to root access under UNIX.. I interviewed with HP in the early 1980's and the subject of TSB came up.

Use basic authentication to restrict access to files on an NTFS-formatted Web server. With basic authentication, the user must enter credentials and access is based on the user ID. To use basic authentication, grant each user the right to log on locally and to make administration easier, add them to a group that has access to the necessary files.
