Controlled Conditions Corporation - Heating & Air ...

A control group in a scientific experiment is a group separated from the rest of the experiment, where the independent variable being tested cannot influence the results. This isolates the independent variable's effects on the experiment and can help rule out alternative explanations of the experimental results. Control groups can also be separated into two other types: positive or negative.

Controlled | Definition of Controlled by Merriam-Webster

In a controlled experiment, most conditions are constrained so that they do not change. One or two other conditions are then changed and measured by the experimenter. These are known as the independent variables. These changes cause some other property or condition, the dependent variable, to change in response. It, too, is measured.
