The Silk Industry Shire Library

The early centers of the English silk industry, Spitalfields, Norwich and Canterbury, benefitted from the arrival of the Dutch or Huguenot silk workers and in 1718 the first factory system for producing silk was begun in Derby. This book traces the legendary silk route from China to the UK and explores the developments in silk production once it ...

A weavers' cottage was (and to an extent still is) a type of house used by weavers for cloth production in the putting-out system sometimes known as the domestic system.. Weavers' cottages were common in Great Britain, often with dwelling quarters on the lower floors and loom-shop on the top floor.Cellar loomshops on the ground floor or in the basement were found where cotton was woven, as ...

Weavers' cottage - Wikipedia

We are familiar with silk for the textile industry, although silk garments are also used clinically to treat dermatological conditions, especially atopic dermatitis 109 and acne vulgaris 110 (Table 2). Mechanical skin irritation by harsh, rough (e.g., wool), and short (e.g., cotton) textile fibers is thought to contribute to atopic dermatitis.

This particular one is a little bigger than most of the Shire books, being more than 50 pages long, and like the other Shire publications that I have read and own, it is an excellent little book. It presents the history of the felt industry in Great Britain in detail, and like the others, it is packed with information, illustrations, and ...

The Felt Industry (Shire Library): Walter, Peter ...

Silk, which was first produced sometime during the fourth millennium BC by the Chinese, was a valuable trade commodity along the Silk Road. By the first century AD, there was a steady flow of silk into the Roman Empire. With the rise of the Sassanid Empire and the subsequent Roman-Persian Wars, importing silk to Europe became increasingly difficult and expensive.
